CORPORATE QUALITY POLICY 2018

ADMINISTRATION DECLARATION

Our company has chosen to operate with a Quality Management System, understood as the Company's tool for the rationalization and improvement of business processes with the aim of creating the required Quality, in order to maintain and possibly increase the current market shares, comparing with the best competitors, respecting the environment, and the target of a "Zero Defect" product.

In conducting the activities, we should all commit ourselves to identifying, defining and respecting the contractual, legislative and / or regulated requirements, continuously improving the processes, the products and the Quality Management System.

During the annual review of the Quality Management System, suitable measurable objectives will be defined that are consistent with the general objectives of the company.

These must be pursued, possibly achieved, with the help of adequate resources that the management undertakes to establish from time to time.

All the personnel according to the role covered in the company, will be constantly involved in considering that the responsibility of the Company's Quality is a problem of all of us, which therefore requires participation in research and proposal of solution to all "trigger points of non-quality".

THE STRATEGIC QUALITY POLICY INPUT IS SUMMARIZED IN THE FOLLOWING POINTS:

KEEP PROMISES TO CUSTOMERS

OFFER THE BEST SERVICE

REQUIRE QUALITY FROM SUPPLIERS

AVOID ERRORS

IMPROVING WITH CONTINUITY, ACTIVITIES AND CONSOLIDATED PRODUCTS

Date: 03rd of October 2018
